

Storing Your Banner..

Helpful hints for the long-term care of your vinyl banner:

1. Clean lightly with water and/or mild detergent or hand soap. Dry the banner thoroughly with a clean soft cloth or a rag.
2. Roll up your banner on or in a tube with the image facing the outside. Do not fold the banner; folding the banner can leave creases on the folds. You can also store the banner rolled in a box.
3. Store the banner in a cool and dry place. Keep out of direct sun, away from heating vents.
4. If you store rolled banners lying down the weight of the banner will flatten the material giving them a wash board effect when rolled out.

Also, avoid prolonged exposure to heat (car trunk, storage building, etc.).

Handicap Sign Inc. is not responsible for any damage done to the banner due to improper handling or storage, weather conditions when using banner or installation methods of the banner.

Proper Storage Methods
